

# Why Commit to a Cloud Strategy Now?

Taking your enterprise to the cloud isn't only about getting ahead. Today, it's about not being disrupted and becoming irrelevant. Cloud is the new normal — for productivity, cost-efficiency, flexibility and growth. After all, application modernization lives in the cloud. Amazon Web Services (AWS) and DXC Technology combine the technology, process, and business expertise you need to complete your transformation journey, your way.

✓ **Unlock modernization, growth and innovation.**

✓ **Improve speed, scale and agility.**

✓ **Lower risk and cost, while increasing security.**

## Unlock modernization, growth and innovation.

- Fast-track design and deployment of new products, services and applications with cloud-based development and a vast library of ready-to-use tools.
- Improve user experience with the flexibility to add new services faster and empower self-service.
- Accelerate the transformation from legacy systems and leverage analytics, automation, and agility.
- Transform your business and drive growth by future-proofing your IT environment and staying ahead of the competition.
- Enhance your workforce's ability to become cloud-centric and focused on modernization- instead of maintenance.
- Scale innovation across the enterprise, combining the breadth of AWS and Amazon's market-leading product and services, DXC's proven cloud and industry capabilities and offerings, powered by the global reach of AWS infrastructure.

### PROOF POINT:

An energy company turned to AWS and DXC to consolidate more than 600 data center servers, improve costs and manage IT services to optimize its operations.

## Improve speed, scale and agility.

- Move beyond physical capacity limitations and scale on demand to meet seasonal fluctuations and cyclical demands and accommodate growth.
- Reduce your licensing administration and cost burdens via AWS licensing optimization.
- Trim administrative overhead while enhancing system availability and reliability.
- Improve business agility and make it easier to maintain business applications by deploying a DevOps model and modern technology stacks.
- Connect siloed data to where it's needed, quickly and securely.
- Exceed customer expectations by leveraging the speed and scale of the AWS cloud to respond to customers' on-demand and unanticipated business, operational, and technology needs – anytime, anywhere.

### PROOF POINT:

A luxury sports car manufacturer improved business performance through enhanced availability and reliability of its critical business applications using DevSecOps and Agile/SAFe methodology.

## Lower risk and cost, while increasing security.

- Rely on your trusted partner for managed services accountability and sourcing continuity.
- Move beyond the security vulnerabilities of legacy systems that aren't always up to handling today's threats.
- Pay only for the resources you use, only when you use them, with cloud-enabled AWS businesses tools, automation and OpEx model.
- Reduce or eliminate IT CapEx by running applications on AWS Cloud services.
- Eliminate maintenance costs for infrastructure upgrades and patches.
- Reduce business risk through improved availability and resiliency of critical applications.
- Solve end of support life (EoSL) challenges by using AWS to keep your server/OS and security software stacks current and supported.

### PROOF POINT:

An insurance company reduced operations cost, security risk and unplanned business outages with a migration to AWS that improved cross-region redundancy, resiliency and recoverability.

## Our partnership. Your advantage.

Nearly half of executives tell DXC that technical debt is the "silent saboteur" that inhibits their ability to innovate and grow. The time to modernize and transform is now—and to do it right, you need to keep quality, security, flexibility, and support. Together, Amazon Web Services (AWS) and DXC Technology have the resources to help you solve complex migration and modernization challenges and accelerate your journey to the cloud.

With top Gartner ratings for Migration Services Expertise, DXC brings deep industry experience, intellectual property, next-generation technology and system integration expertise to meet organizations' business modernization and transformation needs. More than half a million successful workload migrations attest to DXC's track record of helping large, highly regulated enterprises modernize and migrate quickly and effectively.

Since 2018, DXC has been an AWS Solution Provider and Premier Consulting Partner, enabling enterprises to benefit from DXC's operations and migration expertise while using the secure, resilient infrastructure and services of the global leader in managing cloud transitions and operating cloud environments with ongoing applications and support.

While serving over 100 availability zones globally, AWS offers agility, scale, innovation, cost savings, performance, and security on the world's most comprehensive and broadly adopted cloud platform — along with more than 200 fully featured services. Millions of customers, including the world's fastest-growing startups, largest enterprises, and leading government agencies, have leveraged AWS to generate significant business value, deliver industry-leading products and customer experiences, and reinvent for future market leadership.

Together, DXC and AWS have the proven domain expertise and transformation experience to bring that potential to every major industry.
